RoZetta Technology appoints Paul Spence as Chief Data Scientist to drive innovation

Press Release
Sydney, Australia - 4 July 2024

RoZetta Technology, a leading provider of data management solutions, today announced the appointment of Paul Spence as Chief Data Scientist. With a distinguished career in quantitative research, portfolio management, and advanced analytics at prominent financial institutions such as Zurich Investment Management, Deutsche Asset Management, and Sustainable Insight Capital Management, Spence brings a wealth of experience and expertise to the role.

Spence will lead RoZetta Technology's data and analytics product development strategy, leveraging his experience and understanding of capital markets and quantitative funds management to implement cutting-edge ML / AI technologies with RoZetta's team of highly talented data scientists. His focus will be on developing innovative solutions that empower RoZetta's clients to unlock the full potential of their data, drive informed decision-making, and achieve significant business outcomes.

"Having recently secured long-term contracts in the US, Europe and Asia we are very pleased to have Paul join our Leadership team to drive the next phase of our data science product development. With a particular focus on sustainability we look forward to delivering unique value to global markets," said David Sharp, CEO of RoZetta Technology.

"I am delighted to join Rozetta Technology as Chief Data Scientist. This role presents exciting opportunities to leverage our talented team in delivering cutting-edge solutions to data and analytics challenges, driving innovation and creating value in diverse fields such as finance, climate data analysis, healthcare, and sustainable investing. I look forward to contributing to our clients' success in these dynamic sectors." said Paul Spence, CDS of RoZetta Technology.

About RoZetta Technology

RoZetta Technology's capability derives value and insights from big data and analytics through our DataHex platform, data science, managed services, and cloud technology expertise. We have built a strong reputation for building and operating world-class large-scale data and analytic solutions for financial, utility, energy, telecommunications, and government market clients. Our experience is unrivaled in dealing with the complexities of ingesting, curating, and managing global exchange data on behalf of clients such as ICE, Thomson Reuters (now Refinitiv) and Morningstar.

Our team of data scientists and technologists use a research-driven, systems-design model that has delivered over $4b in returns to our industry partners. Together with our clients, we continue to develop and refine next-generation technology solutions.
